

### 1. Data analysis

- Work clustering in Culturegraph
- Focus on persistent identifiers
- Automatic indexing

#### 2. Research support

### **Data basis**

Hans Kopp

#### DEUTSCHE NATIONAL BIBLIOTHEK

#### Data science & Data analysis at German National Library (DNB)

### **Work cluster**

- Each record posesses one or more matchkeys
- Clusters accumulate identical keys
- All records sharing at least one identical key with a member of a cluster belong to the cluster

### Possible transfers of metadata content

# Transfer of links to person authority files from work clusters

- Check correctness of link

Abteilungsversammlung IE | 3.3.2022

# **Enrichment with content descriptions**

RSWK-Folgen im Buendel vorhanden Schlagwörter im Buendel vorhanden FormSLW/Angaben zum Inhalt im Buendel vorhanden Klassifikationen im Buendel vorhanden DDC-Notationen im Buendel nicht vorhanden DDC/Synthetische Komponenten im Buendel nicht vorhanden

DNB records with sequences of index terms DNB records without sequence of index terms None Transfer of If none of the preceeding sequences of index terms from If none of the preceeding Transfer of other DNB-If none of the sequences of index records Transfer of terms from title preceeding authority records from other controlled index Transfer of index regional library terms from GND terms from other networks thesauri

Transfer to dedicated data fields for external content with provenance information

Same proceeding for transfer of DDC notations

### Statistics work clusters (2/2022)

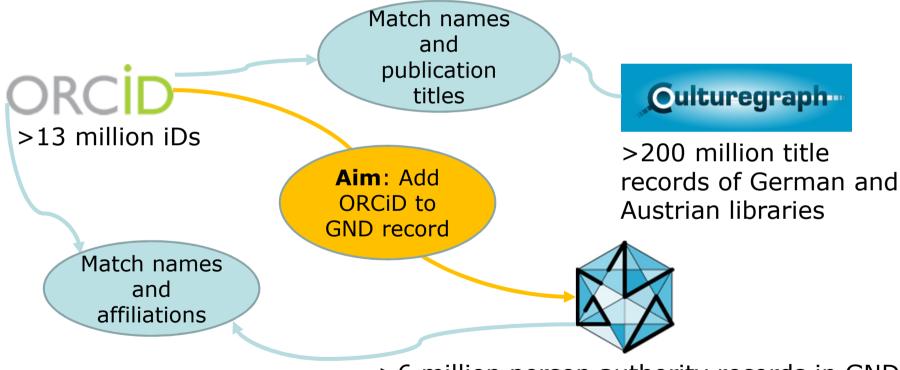

- 129,546,109 records processed (excluded: dependent parts, serials)
- 19,419,514 clusters with more than one member
- comprising 99,267,013 records
- Average cluster size (when more than one member): 4.7

### Focus on persistent identifiers

- Establish and strengthen networks of persistent identifiers by indentifying links and enriching title and authority records
  - GND
  - ORCID
  - ISNI
- Automatic processes examine persistent IDs in title records and authority file records daily and create links
- User claimings serve as a basis for links and suggestion for new person authority records

# Matching ORCiD-Culturegraph Enrichment of title and authority records with ORCiDs

>6 million person authority records in GND

## Automatic assignment of indexing information

- Automatic subject indexing with Annif.
- Automatic Indexing: GND descriptors
- Automatic Classification
  - DDC Subject Categories
  - DDC Short Numbers
- Tests of different associative approaches (TFIDF, fasttext, omikuji ...)
- Evaluation of assignment of GND descriptors: 68% (very) useful

### 1. Data analysis

### 2. Research support

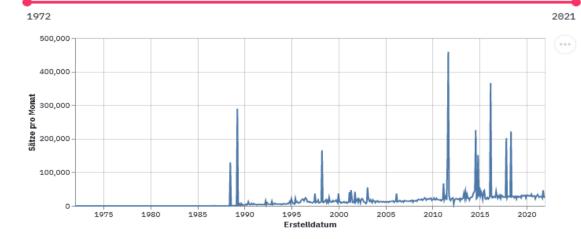

- Visualization of authority file
- Text+: Research data management
- Rsearch support in Digital Humanities

### **GND Dashboard**

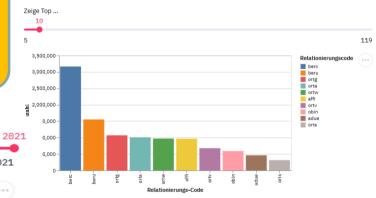

Interactive Visualization of statistics derived from the Integrated Authority File (GND)

#### Relationen

GND-Datensätze können mit anderen Datensätzen verlinkt (»relationiert«) werden. Die Art der Verlinkung wird über einen Relationierungscode beschrieben. Hier sind die am häufigsten verwendeten Relationierungscodes zu sehen. Die Auflösung der wichtigsten Codes gibt es hier.

ionen zwischen Entitäten gesamt: 13.290.389

https://share.streamlit.io/deutschenationalbibliothek/gnddashboard/main/dashboard/gnd-app.py

### Text+

- Project funded by German Research Foundation as part of National Research Data Infrastructure (NFDI)
- Preserve text- and language –based research data for long term and facilitate use in academia
- OA content (metadata, TOCs)

online dissertations from catalogue LZ

(MARC21-xml)

https://www.dnb.de/EN/Professionell/Services/WissenschaftundForschung/DNBLab/dnblab\_node.html

### **DNBLab**

- Theme-based data sets for download
  - Digitised tables of contents (>2 million)
  - Free online publications (>500,000)
  - Free online dissertations (>245,000)
  - Free digital sheet music (>2,600 items)
  - Articles from German-language Exile Journals 1933-45 (>230,000 articles)
  - And more
- Jupyter Notebooks as tutorials and examples
  - Access data via different interfaces
  - Title analysis in MARC21 metadata
- Online tutorials
- https://www.dnb.de/DE/Professionell/Services/WissenschaftundForschung/DNBLab/dnblab\_node.html

### **Digital Humanities research support**

- Collaborations with researchers in individual projects where DNB provides selected metadata content or access to full texts on the premises (e.g. Children and Youth literature, dime novels)
- DNB offers a yearly DH call. Applicants can obtain access to DNB data and infrastructures to work on Digital Humanities projects involving DNB content.
- DH Fellowship: investigate DNB's metadata and digital content for research purposes and receive a funding for a period up to 12 months
- participation in NFDI4Culture a consortium funded in the German National Research Data
   Infrastructure (NFDI) framework concentrating on cultural heritage

### Thank you very much for your attention.
